

DEPARTMENT OF OBSTETRICS, FERNANDEZ
HOSPITAL PRESENTS

Hands-On Training in Point-of-Care Ultrasound (POCUS)

In obstetric emergencies,
timely decisions save lives.

The Department of Obstetrics brings you a focused Point of Care Ultrasound (POCUS) Workshop designed to strengthen bedside assessment through real-time imaging and hands-on practice.

With POCUS now a critical skill in obstetric care, this workshop equips clinicians to confidently perform, interpret, and integrate ultrasound findings into emergency decision-making, enhancing speed, precision, and clinical outcomes.

WHAT YOU WILL LEARN

- Core principles and practical applications of POCUS
- Image interpretation for rapid clinical decision-making
- Managing real-world obstetric emergency scenarios
- Ensuring reproducibility and reliability in critical care settings

COURSE HIGHLIGHTS

- Expert lectures by faculty from JIPMER and Fernandez
- Hands-on training on live subjects
- Interactive case-based discussions
- Pre-test and post-test assessment
