

HERF PRESENTS

Obstetric Protocols: An Update

Strengthening Clinical Decision-Making
Through Evidence-Based Care

WHY ATTEND

In obstetrics, consistency saves lives. This one-day, highimpact seminar helps you standardise care, sharpen clinical judgement, and apply evidence-based protocols with confidence — across both everyday and complex scenarios. Led by experienced clinicians, it brings together practical insights, real-world case discussion, and protocol-driven approaches that improve outcomes for mother and baby.

WHAT YOU WILL LEARN

- **Recurrent Pregnancy Loss**
Guidelines
- **SLE in Pregnancy**
Flares, APLA overlap, and protecting the fetus
- **Cardiac Disease in Pregnancy**
Telling normal physiology from pathology in time
- **Morbid Obesity**
The anaesthetic and monitoring pitfalls beyond BMI
- **Vaccination in Pregnancy**
What to give, what to defer — a schedule for clinic
- **Diabetes: What's New**
Updated thresholds, newer agents, revised teaching
- **Term PROM**
The 12-hour question and lowering the caesarean rate
- **Maternal Sepsis**
Catching the subtle early case in the golden hour
