ACADEMIC EVENTS | ETHICON a Johnson & Johnson company

FHERF, in association with ETHICON,
presents a Hands-on Workshop on

Management of 3rd/4th Degree Perineal Tears (OASI)

Master a Skill That Changes Lives

Obstetric Anal Sphincter Injuries (OASI) remain one of the most significant yet under-recognised causes of long-term anal incontinence in women. The difference between lifelong morbidity and recovery often lies in early recognition and the quality of repair.

This intensive, skill-focused workshop is designed to equip you with the confidence, precision, and clinical judgement required to manage these complex injuries effectively.

WHY YOU SHOULD ATTEND

- Learn step-by-step repair techniques from experts
- Strengthen your understanding of applied anatomy & physiology
- Gain hands-on experience with realistic simulation models
- Improve outcomes for women through evidence-based care
- Navigate clinical dilemmas and medico-legal challenges with clarity

WHAT YOU WILL LEARN

- Applied anatomy & classification of perineal tears
- Evidence-based repair techniques (with surgical videos)
- Anorectal physiology & investigations
- Role of endo-anal ultrasound in follow-up
- Management of anal incontinence & secondary repair
- Pelvic floor muscle rehabilitation
- Medico-legal considerations in OASI

CANCELLATION & REFUND POLICY

- **No refunds or cancellations will be accepted**

WHO SHOULD ATTEND

- Consultants
- Registrars
- PGs
- Fellows
- Midwives
- NMEs
